ALPINE AEROTECH LP

Alpine Aerotech Tailboom Protection

**ALPINE AEROTECH SECURES TCCA, FAA & EASA STCs FOR INNOVATIVE
BELL MEDIUM TAILBOOM BAGGAGE PROTECTION**

Kelowna, BC (February 15, 2017) — ALPINE AEROTECH announced today that they have officially secured Transport Canada Civil Aviation (TCCA), Federal Aviation Administration (FAA) and European Aviation Safety Agency (EASA) STC's for their innovative Tailboom Baggage Protection Kit, specifically designed for Bell 205, 212, and 412 helicopters. Previously installed as a minor modification, Alpine Aerotech is now pleased to offer its expanding customer base another certified solution product.

"The Alpine Aerotech Baggage Protection Kit is light weight and very durable," explains Kelly Bean, director of maintenance at Hillcrest Aircraft Company. "This kit offers the best protection available in the industry and the installation is quick and easy."

The Tailboom Baggage Protection Kits are constructed from leading edge material, specifically design to absorb and attenuate energy while providing operators with a weight savings when compared to popular protection alternatives.
